

Aedes antenna

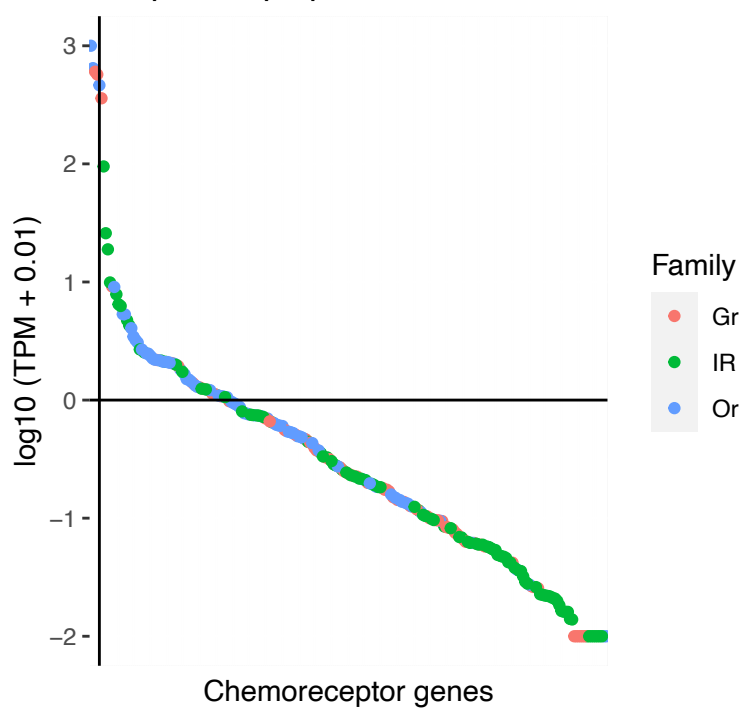

Aedes palp

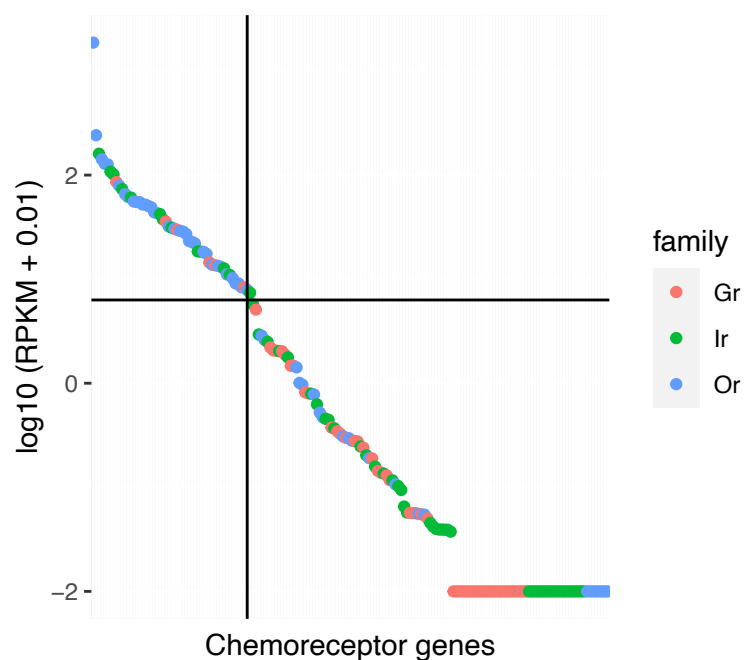

Anopheles antenna

Anopheles palp

Drosophila antenna

glomerular counts used (for vertical lines):

Aedes: 61 (3 palp)

Anopheles: 67 (5 palp)

Drosophila: 51-58 (6 palp)

TODO list:

- few last stubborn IRs in Anopheles annotation
- plot replicates with error rather than mean
- convert Drosophila RPKM to TPM
- determine unbiased way of drawing horizontal line
- Veronica update .gff3 - change
